- Instructor Training
- Team Member Recruitment
- AED Tracking
- Site Auditing
- Compliance Checks

LHS is dedicated to providing exceptional medical education, programming, and consulting services to healthcare providers, corporations, communities, and churches. LHS provides setup and ongoing Automatic External Defibrillator (AED) services such as physician oversight, nurse and physician event review, and EMS/Healthcare coordination and training.

The LHS AED program adapts to your individual or corporate needs. We can support you in part or all of your design, implement, and maintenance needs. Put our experience as health care professionals to work for you. We offer all the puzzle pieces needed to establish and maintain your AED program.

We provide your organization with tools, knowledge, and training. AEDs are only part of the chain of survival. Let us help develop your program team.

Because the AED is only as good as its operator.

Establishing and maintaining a successful AED program is time consuming and start up of the AED program, no matter what size, often requires someone to take on a whole new job. With LHS we can offer a solution to your needs by becoming your complete source for design, implementation, and maintenance. The professional nurses and physicians at LHS are here for your every step, plus LHS is a local company with local ties to the local health care system. Already have an AED program in place and only need select services? LHS can cover all your AED and medical training needs, regardless of size.

Design

A Personalized Plan

LHS offers access to a highly trained medical professional who will visit your site. Our needs assessment will offer you valuable and helpful solutions like response plan development and site assessment. By collaborating with your needs LHS offers what other companies cannot, a local source for your AED program solution.

- ♥ We assess your educational needs
- ♥ Recommend the AED that best meets your needs
- ♥ Walk through all the regulatory information
- ♥ Examine your risk management objectives
- ♥ Design or add to your training program
- ♥ Policies and Procedures review
- ♥ Answer your questions

Implement

Implementing Your Plan

Implementing an AED program requires access to medical professionals who have your medical and legal needs in mind. LHS offers access to physicians and nurses who can provide state required oversight for your AED program. For example LHS can secure the FDA required prescription for your AED and we can arrange for physician oversight. LHS will also:

- ♥ Provide CPR/AED Training
- ♥ Help your program meet all state regulatory compliances
- ♥ Provide on site help with implementing your program
- ♥ Review your deployment and maintenance procedures
- ♥ Test your response and training systems
- ♥ Interface with local Emergency Medical Services

Maintain

Maintaining Your Plan

Many have found that designing and implementing an AED program takes a lot of effort and time. Why waste that invested effort by not maintaining? The specialists at LHS can build a team within your system that offers years of cost effective support and usefulness. We even seek ways to eliminate as much cost as possible by:

- ♥ Providing Instructor Training
- ♥ Team Member Recruitment
- ♥ AED Tracking and Educational Software
- ♥ Site Auditing & Compliance Checks
